

PESAVENTO

Art expressions

COLLECTIONS JANUARY 2017

**The beauty of each new item is an element of something unexpected and yet profoundly recognisable.
Here are the new Pesavento collections: able to surprise and, at the same time, renew the esprit of their origins.**

Dna Spring and Polvere di Sogni are the most popular and desirable Pesavento collections for women. These embody pure temptation, and are loved for their bright hues, soft lines and sharp and strong design.

Alongside the beautiful bestsellers, represented with growing success as variations on a theme and in novel shapes and sizes, Pesavento now presents exciting new proposals. These are themed micro-collections, with their own identity and character all to be discovered.

DNA SPRING & POLVERE DI SOGNI

The power of an embrace

Light plus light. Desire plus desire. Beauty plus beauty. Everything in this new collection has been brought up to full power, intensified by the merge of the two most popular Pesavento collections.

The vibrant design of DNA Spring meets the magic touch of Polvere di Sogni. Silver takes shape with a thousand variations in colour and size to become bright and airy necklaces, bracelets, rings, earrings or maxi pendants.

DNA SPRING

New copyrighted interpretations

A true star always knows how to catch the eye. In this way, DNA Spring reintroduces the bestsellers that have marked its incredible debut and adds new interpretations that highlight its elegant allure.

The soft swirls of silver thread and special designs come together in the rings with their precise volumes, accentuated by futuristic shapes that are highly modern and minimal while unexpectedly passionate.

POLVERE DI SOGNI JOINT

Design and poetry

Fall in love with a form. Look it up and down and desire it instantly: it is a pure ring, invested with a perfectly scintillating beauty quite unique to Polvere di Sogni. It is even better when paired with the smooth version to create a graphic and chromatic rhythm. Or when combined with multiple designs for really glam compositions.

POLVERE DI SOGNI BOLT

The seductive power of design

Dare is the most exciting game of beauty. Finding harmony in the attraction of opposites: rigour and creativity, strength and lightness, volume and minimalism. It is a dive into the essence of Pesavento's style.

The Bolt rings emphasise the seductive and extraordinary strength of pure design. They create a rhythmic volume and develop upon the allure of light and its opposite.

Feelings: big and small moments of happiness by Pesavento

It is always a good time to wear or give a Pesavento jewel. There is always an opportunity to start a beautiful story: with a small or large gift to celebrate the many emotions of a woman; and to express a sudden joy or the best feeling of all. These are valuable ideas for a young and romantic heart, to give as a gift or to treat yourself: rings, necklaces with pendants, bracelets, charms. All are elegant and refined temptations available in top collections with a certain something not to be missed.

DNA SPRING CHARMS

These charms, small poems about light, hang from a thin DNA Spring thread. They are inspired and essential in design and shine with all the nuances of Polvere di Sogni.

POLVERE DI SOGNI JOLIE

A touch of delicate elegance, a wish fulfilled with Polvere di Sogni rings. Minimal design and refined colours shine on the skin and enhance beauty.

POLVERE DI SOGNI VORTICE

Light glitters on a row of tiny silver beads that follow on to meet the brush-strokes of Polvere di Sogni. And then return in a whirlwind of reflections.
